SUNSHINE FACILITIES GROUP · WEBSITE CMS

Website CMS — User guide

Generated 2026-11-05 from docs/user_guide/user-guide.md

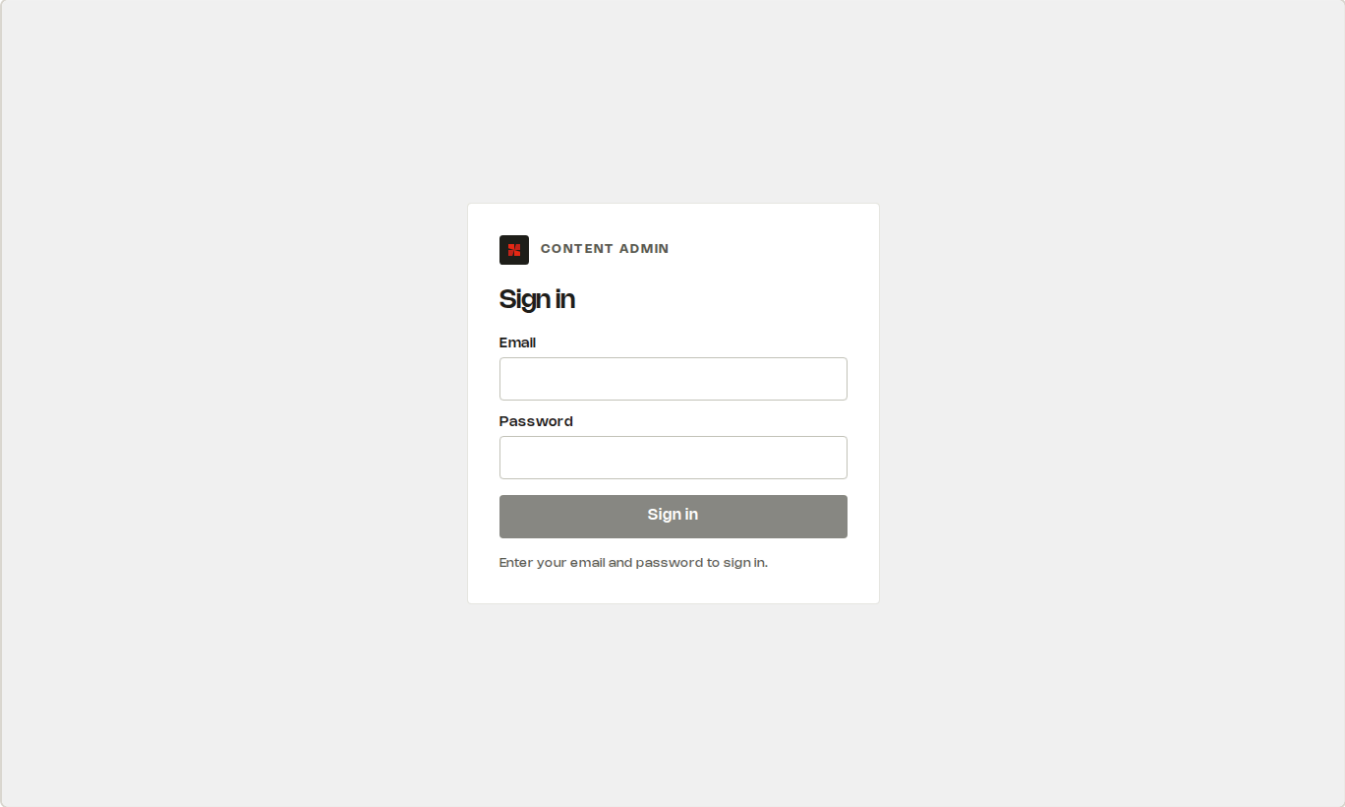

Contents

1. Signing in
2. Lists: search, filter, export
3. Editing content
4. Certificates
5. Media library
6. Parameters (settings)
7. Inbox
8. Users (superadmin)
9. Audit history (superadmin)
10. Outgoing mail (superadmin)
11. Your account
12. Good habits

For the people who edit the Sunshine Facilities Group website, read its inbox, and look after the people who use it. Every picture in this guide is a screenshot of the real CMS, retaken whenever the CMS changes.

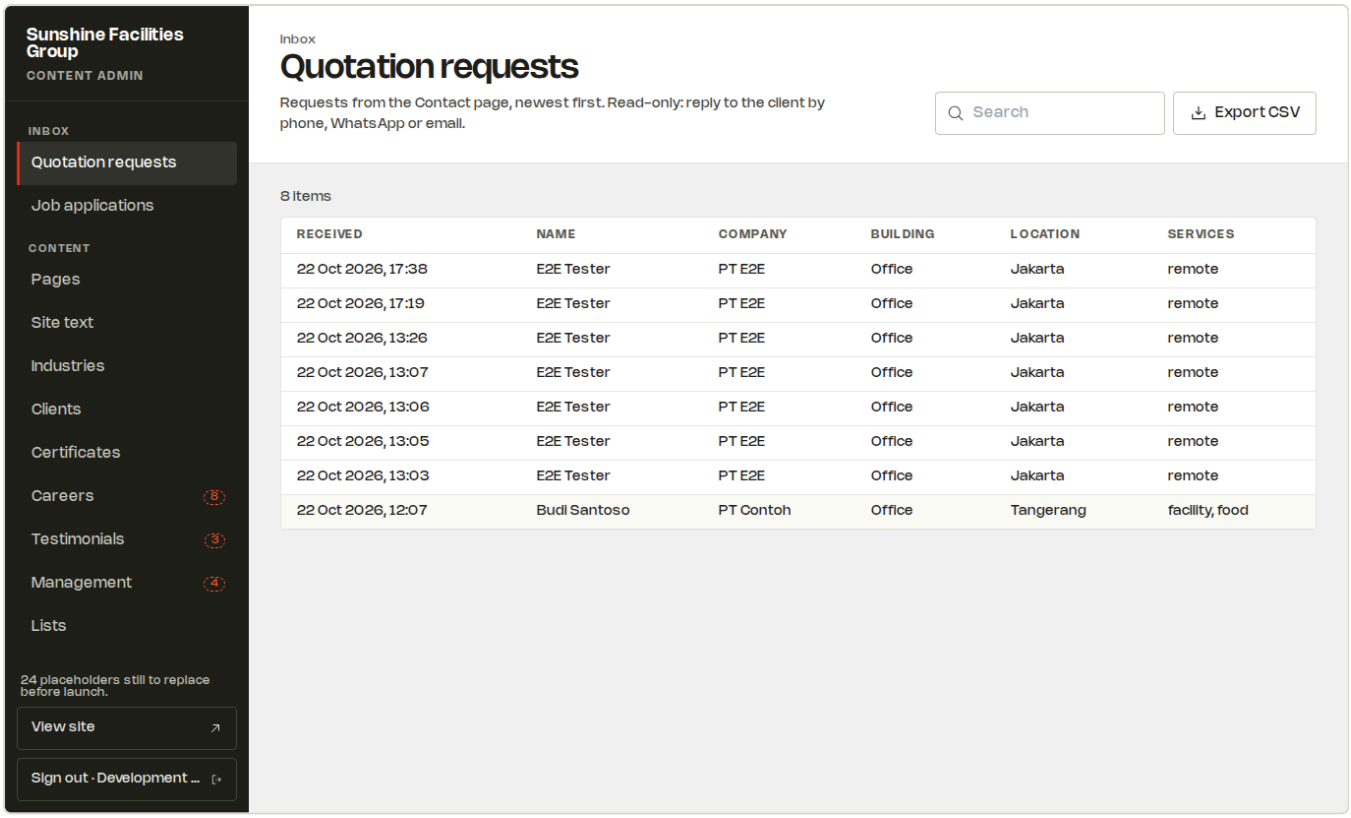

Signing in

Open **https://www.sunshinefacility.com/tytb** (the old address sunshinefacility.sunshinefood.co.id/tytb redirects there). Enter your email and password and press **Sign in**.

- The button stays grey until both boxes are filled; the line under it says what is missing.
- After **5 wrong passwords** the account locks for **15 minutes**. A superadmin can unlock it at once by setting a new password.
- **Forgotten your password?** There is no self-service reset. Ask a superadmin: *Users → your name → Reset password*.
- You stay signed in for up to 7 days on the same browser. **Sign out** (bottom left) when you use a shared computer.

After signing in you land on the first screen your role allows. The sidebar on the left lists everything you can open; screens your role cannot use are not shown.

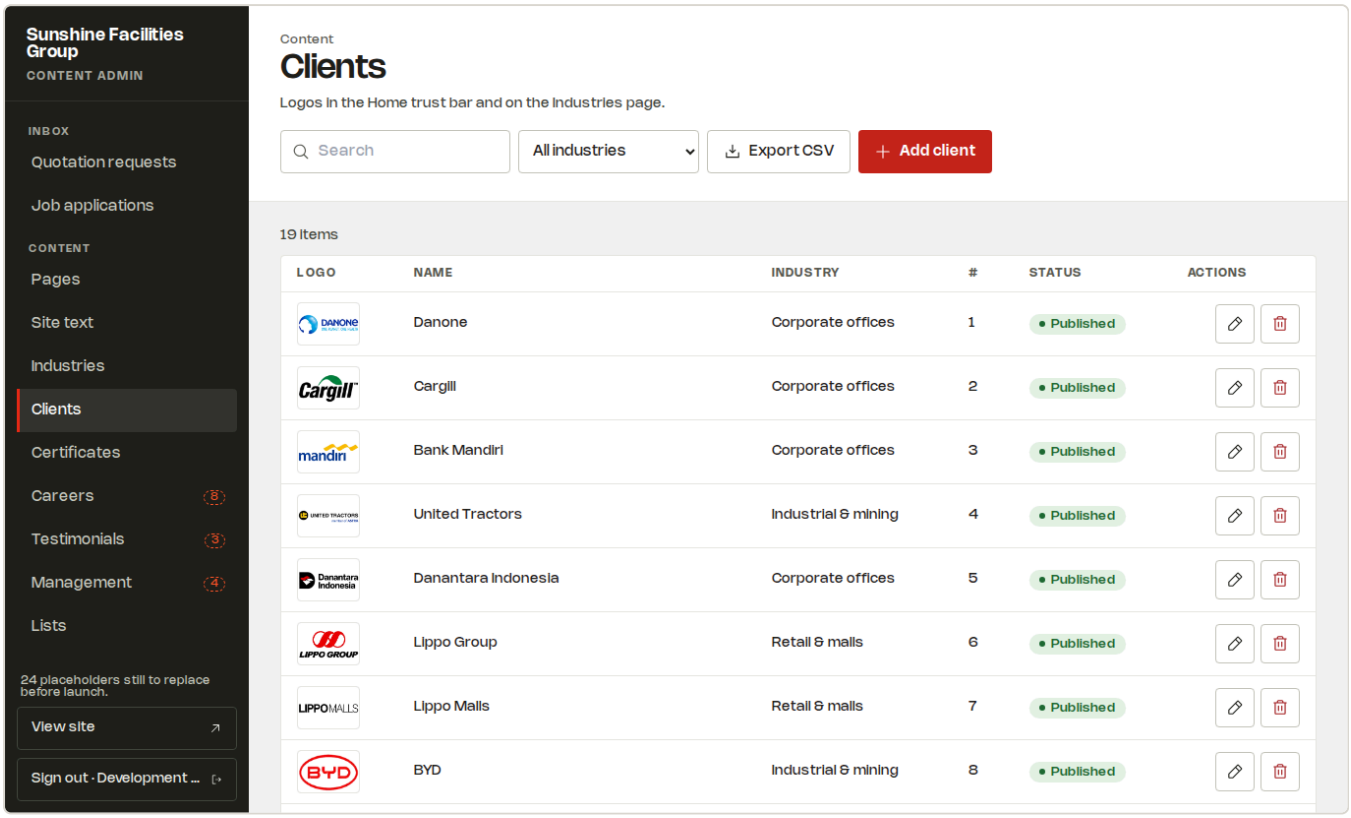

The red dashed numbers in the sidebar count **placeholders**: provisional content still to be replaced (see *Placeholders*). The line above **View site** gives the total. **View site** opens the public website in a new tab.

Your role decides what you see

You are	You can
Editor	change every text and image on the site; upload images; edit contact details, locations, job types, building types and brand colours
Sales	read quotation requests
HR	read job applications and open CVs
Superadmin	everything, plus users, notification recipients and other settings, audit history and outgoing mail

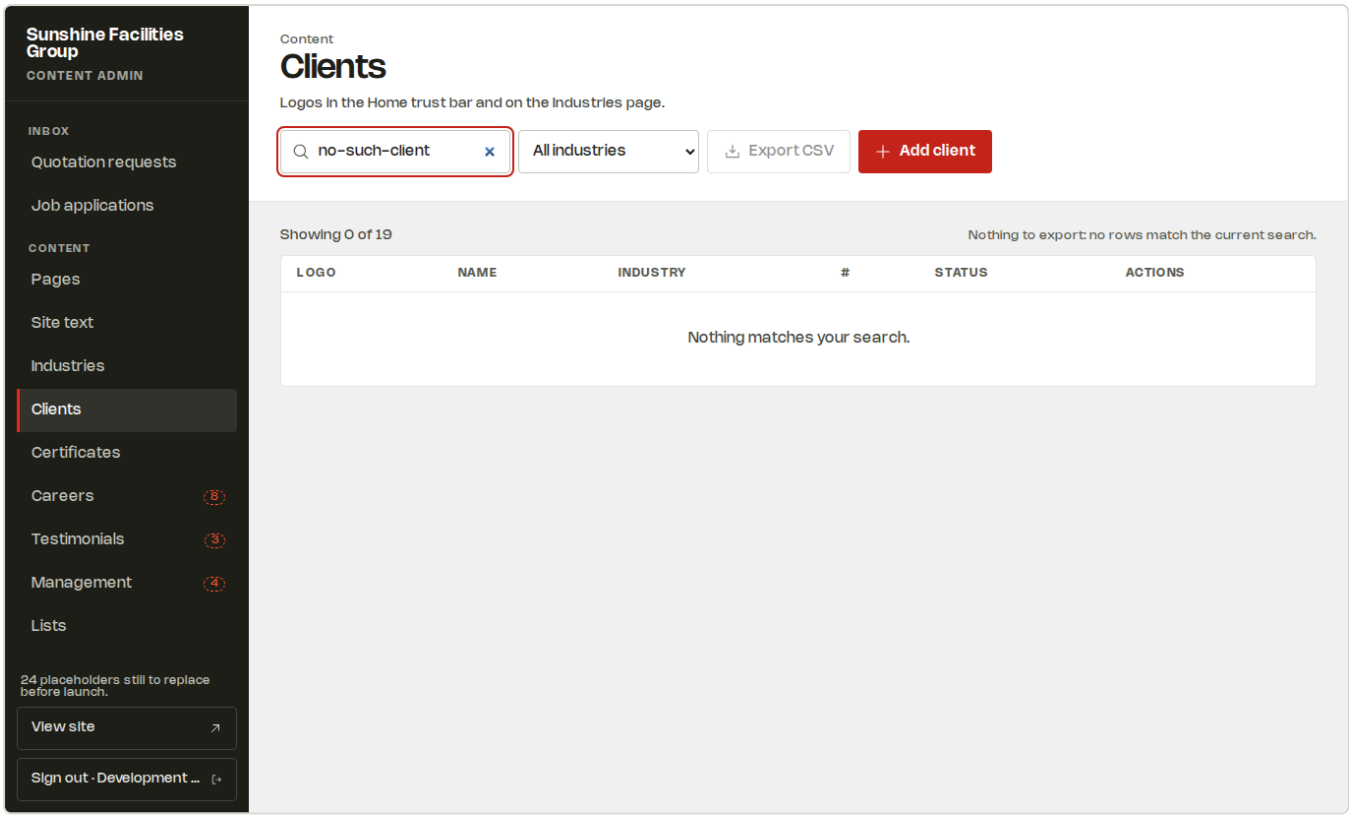

Lists: search, filter, export

Every screen is a list that works the same way.

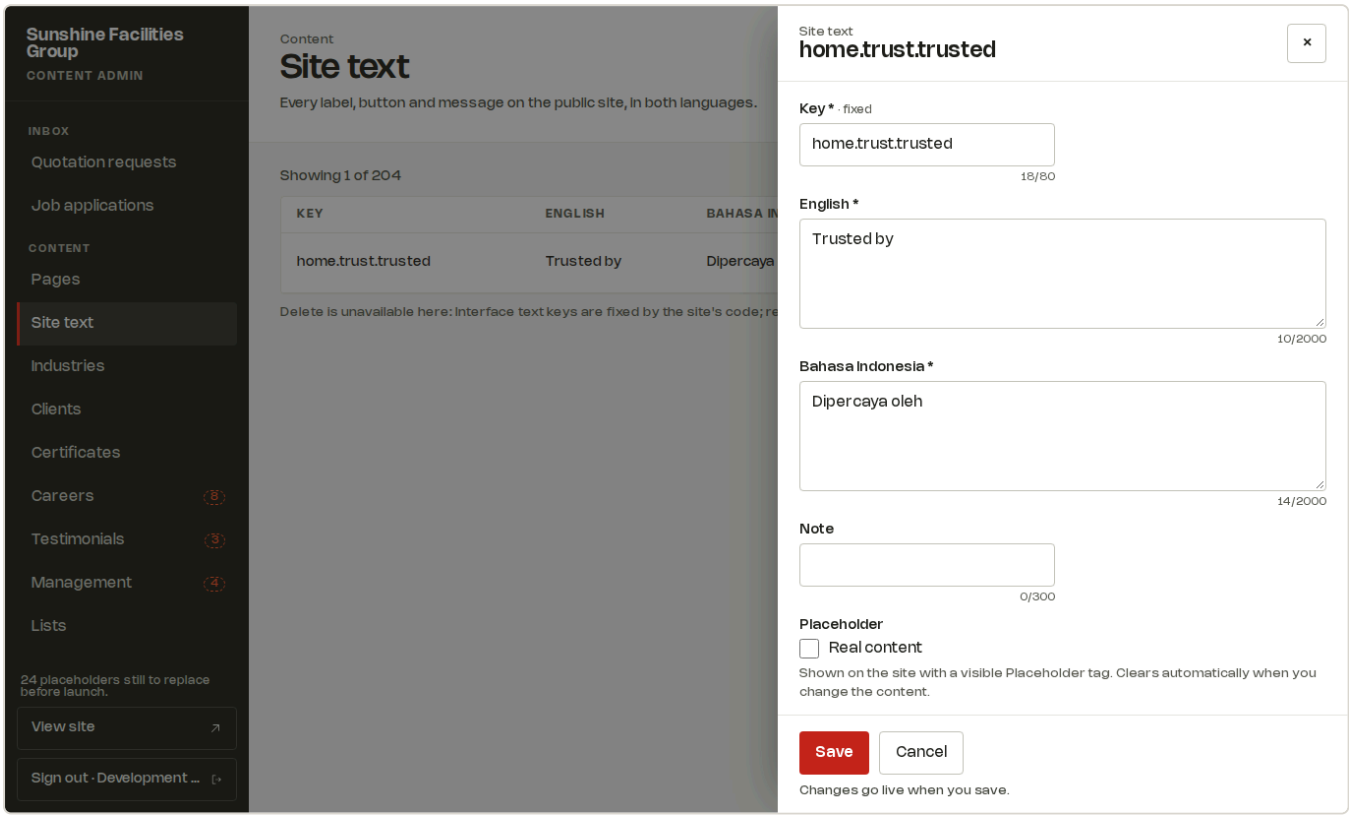

- **Search** box: type any words; the list narrows as you type. The **×** clears it.
- **Filters** beside it where useful (page, service line, list, group, industry…).
- **Export CSV** downloads exactly the rows you see, with the search and filters applied. Columns are separated by `|` (pipe), so Indonesian addresses with commas open correctly in Excel.
- **Add** creates a new row. It is greyed out where the rows are fixed by the site (for example Pages and Site text), and the screen says why.
- The **pencil** opens the editor on the right; the **bin** deletes after asking you to confirm.

A greyed-out button always tells you why. Here the search matches nothing, so there is nothing to export:

Nothing matches your search.

Editing content

Press the **pencil** on a row. The editor opens on the right.

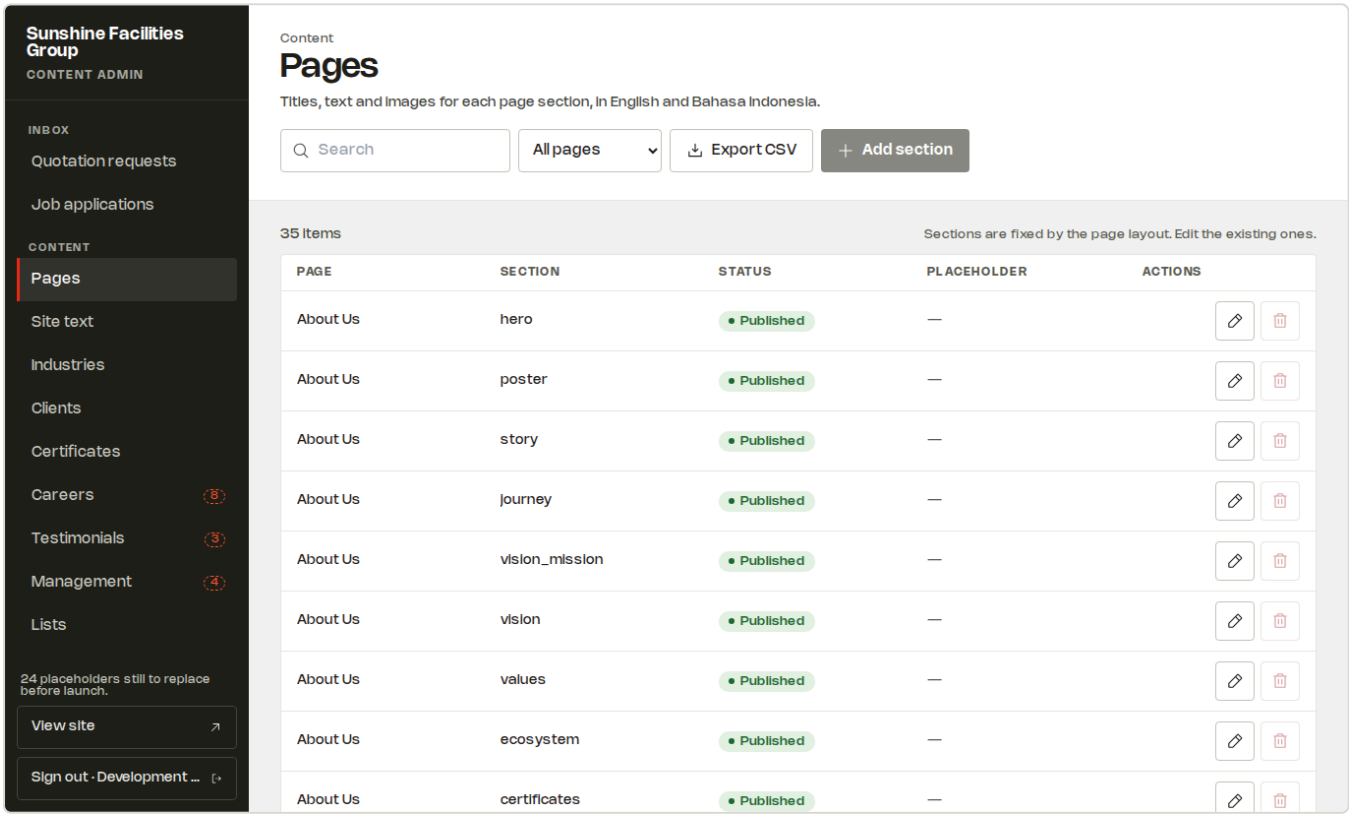

- Fields marked ***** are required. **Save** stays grey with *"To save, fill in: …"* until they are filled.
- Every text has an **English** and a **Bahasa Indonesia** box. Fill both: visitors switch language at the top of the site.
- The small counter under a box shows how many characters are left.
- Images: **Choose from media** opens the media library with a search box.
- **Published**: ticked means on the site, unticked means *Draft (hidden from the site)*. **Placeholder**: ticked means shown with a *Placeholder* tag.
- **Changes are live on the site as soon as you press Save.** Cancel (or Esc) closes without saving.

Where each thing on the site is edited

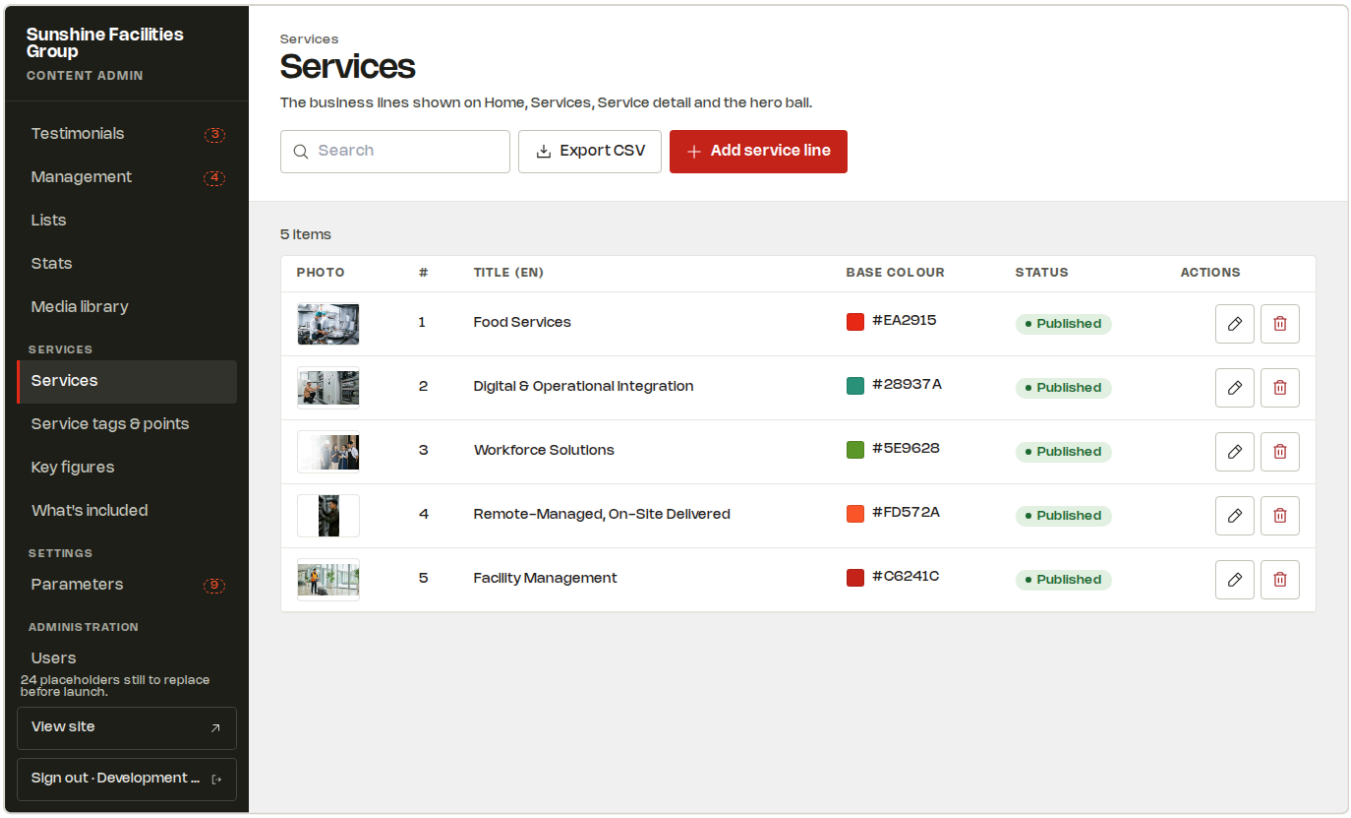

On the site	In the CMS
Big headings and their paragraph on any page	**Pages** (filter by page)
Buttons, labels, small text, form messages, footer lines, SEO titles	**Site text** (search for the words you see)
The five service lines: names, descriptions, colours, photo	**Services**
Tags under each service, figures (5M+ meals…), "What's included"	**Service tags & points**, **Key figures**, **What's included**

On the site	In the CMS
Sectors on the Industries page and which services they use	**Industries**
Client logos	**Clients**
Certificates	**Certificates**
Job openings	**Careers**
Client quotes	**Testimonials**
Management team	**Management**
Why Sunshine points, journey timeline, mission, values, Lippo sectors, "one contract…", proof points, reasons to join	**Lists** (filter by list)
10+ years, 18+ cities…	**Stats** (Home and About separately)
Phone, WhatsApp, email, address, hours, map pin, social links	**Parameters → Contact details / Social links**
Building types in the form, locations, job types	**Parameters** (option groups: you can add rows)

Pages holds the headings and paragraphs of each page section:

Services holds the five business lines, with their photo and colour:

Careers holds the job openings. **LinkedIn job post** is optional: paste the link of the same job on LinkedIn (it must start with `https://www.linkedin.com/`) and the opening on the website shows a **View on LinkedIn** link next to *Apply for this role*. Leave it empty if the job is not on LinkedIn.

Placeholders

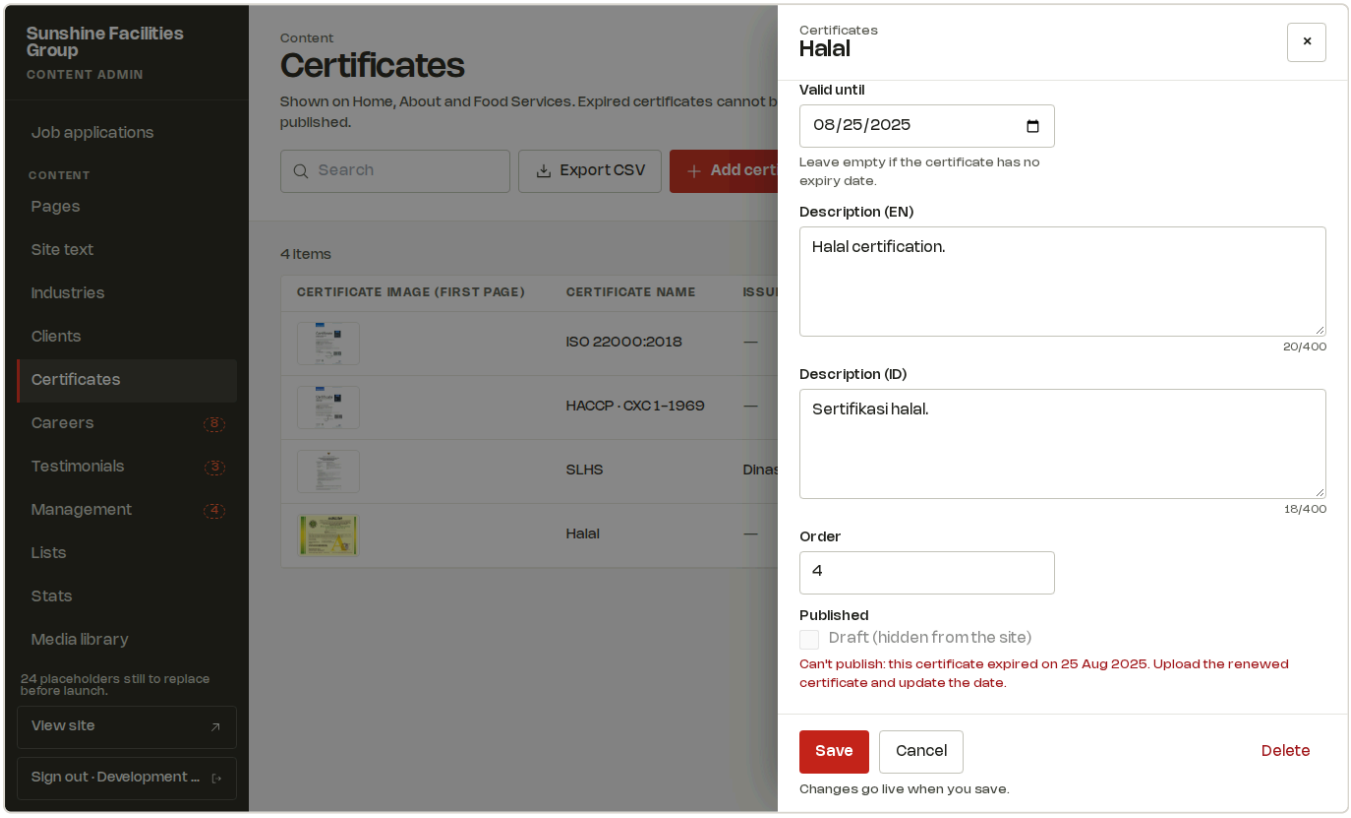

Some content is provisional: contact details, social links, testimonials, management, openings, vision and mission. It shows on the site with a dashed **Placeholder** tag, and the sidebar counts how many remain.

- **Change the content and the tag disappears by itself.**
- To confirm content as real *without* changing it, open it and **untick** the Placeholder box: the label changes from *Still a placeholder* to *Real content*.
- Before launch the sidebar total should be **0**.

Certificates

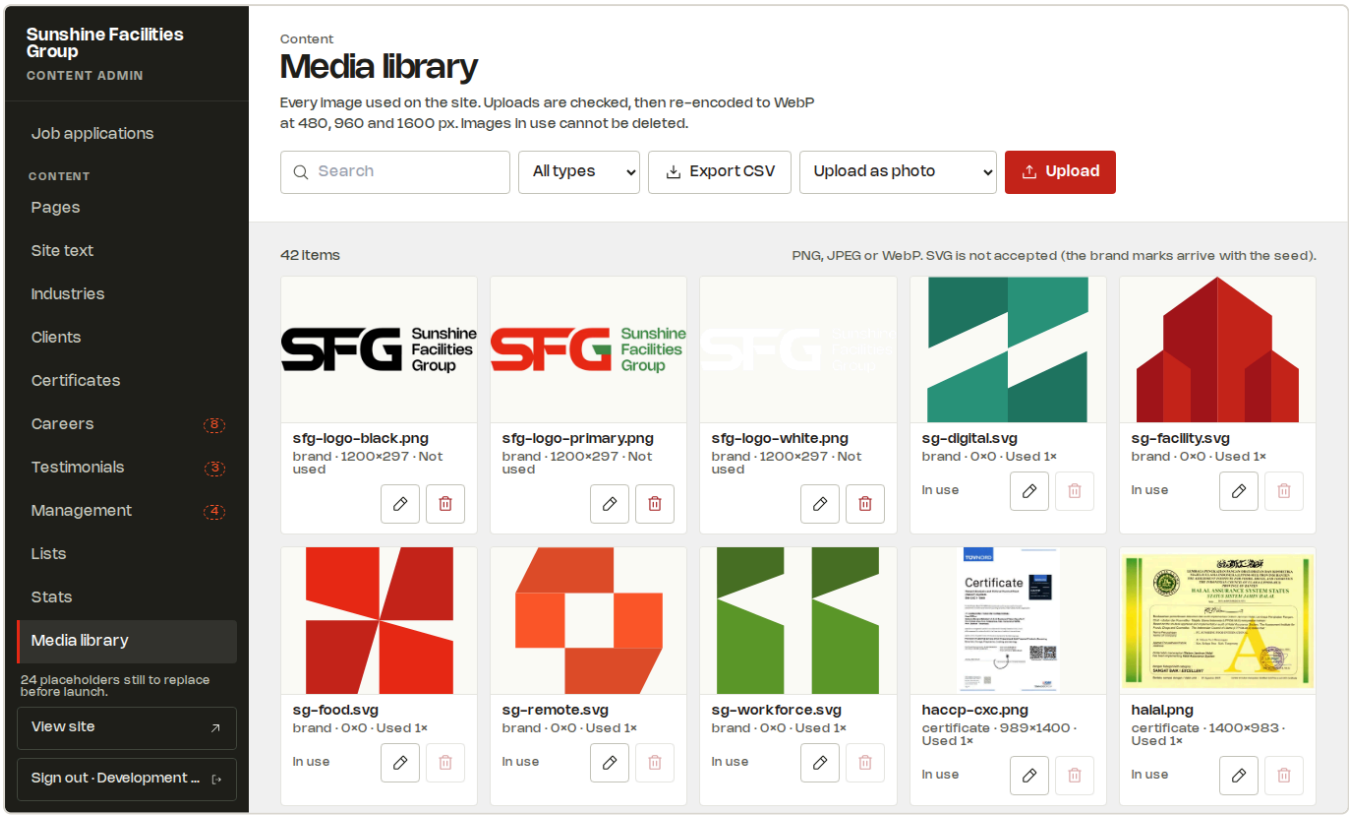

Certificates appear on Home, About and Food Services.

- A certificate past its **Valid until** date shows **Expired** and **cannot be published**: the switch is greyed out and says why.
- To renew: upload the new certificate in **Media library**, open the certificate, **Choose from media** to pick the new image, set the new date, then publish.
- A reminder email goes out some weeks before a certificate expires (60 days unless changed). The day after it expires it leaves the website by itself.

Media library

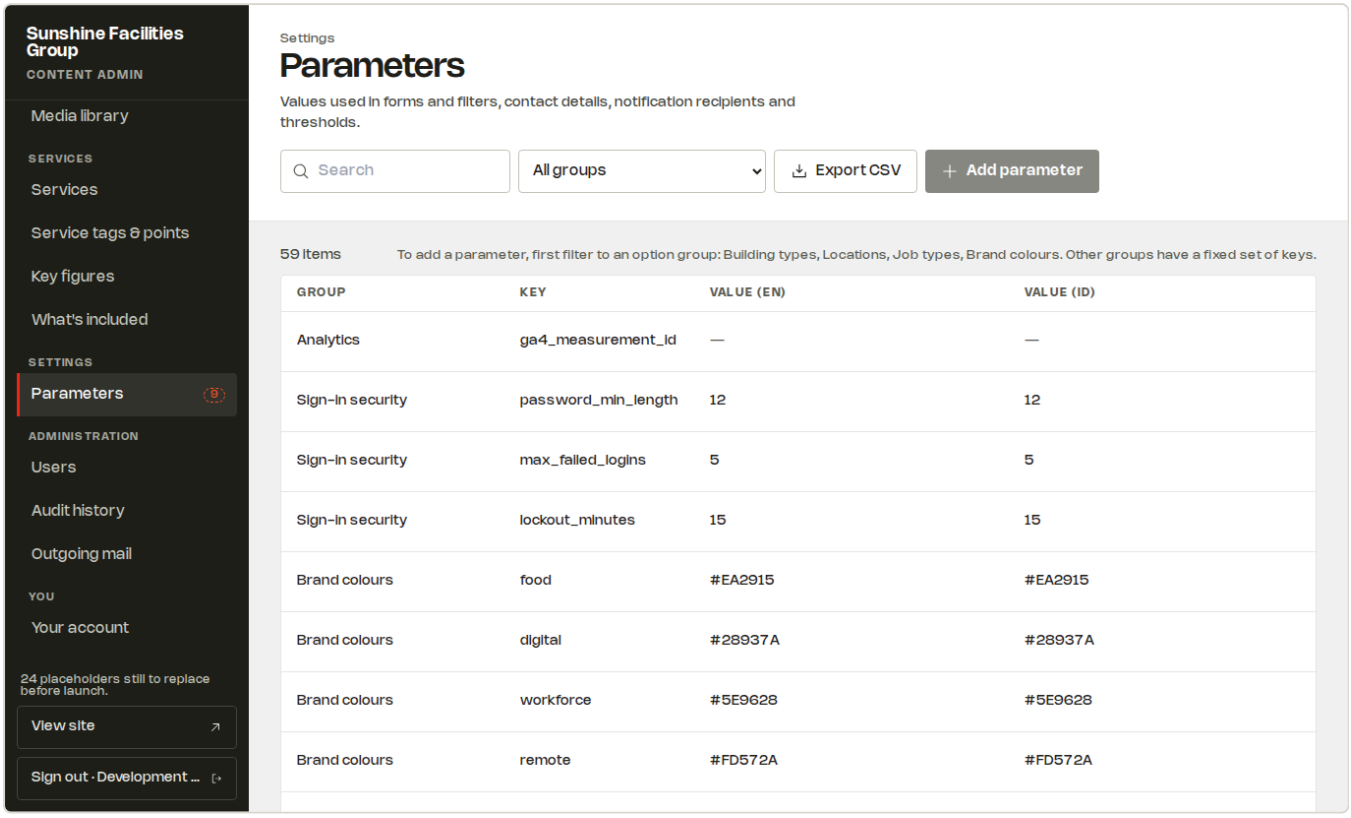

Every image used on the site lives here.

- Choose **Upload as** photo, logo, certificate or brand, then press **Upload**. PNG, JPEG or WebP; SVG is not accepted.
- The site checks the file and makes sharp, small versions automatically (480, 960 and 1600 px wide).
- Press the **pencil** to set the name and the **alt text** in both languages: what a blind visitor's screen reader says.
- An image **in use** cannot be deleted. Its bin is greyed out and says where it is used; replace it there first.

Parameters (settings)

Values used by forms and filters, contact details, notification recipients and thresholds. Filter by group to find a value quickly.

Group	What	Who can change it
Contact details, Social links	phone, WhatsApp, email, address, hours, map pin, social URLs	editor
Building types, Locations, Job types	the choices in the forms and career filters (you can add rows)	editor
Brand colours	the five service-line colours	editor
Notifications	`quotation_to`, `career_to`, `certificate_to` (comma-separated emails), `from`	superadmin
Certificates	`reminder_days`	superadmin
Careers	`retention_months`, `cv_max_mb`	superadmin
Forms and spam protection	`min_fill_seconds`, `per_ip_per_hour`, `per_email_per_hour`	superadmin
Media uploads	`max_upload_mb`, `max_dimension_px`	superadmin
Sign-in security	`password_min_length`, `max_failed_logins`, `lockout_minutes`	superadmin
Analytics	`ga4_measurement_id` (empty means no analytics)	superadmin

Group	What	Who can change it
Search and link previews	`og_image` (the name of a media item)	superadmin

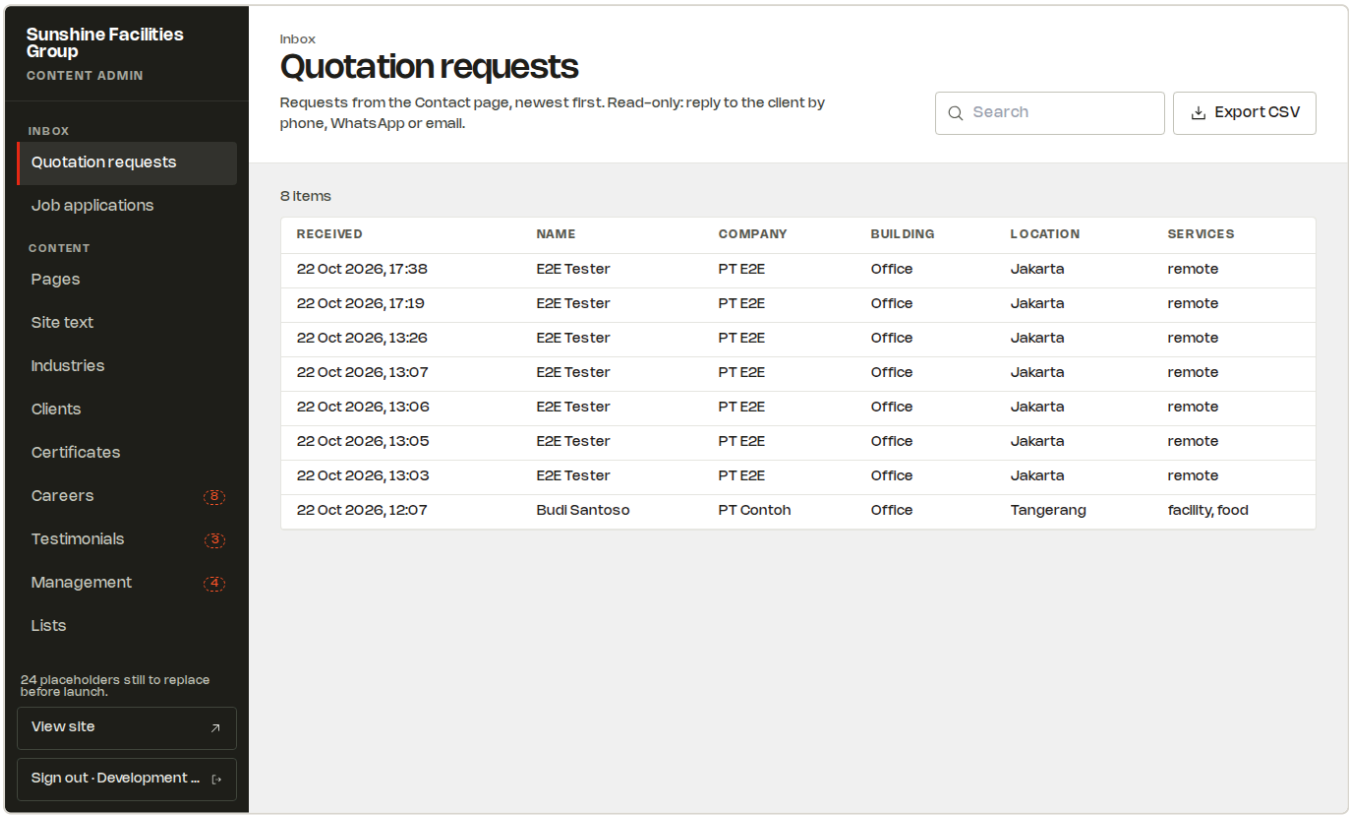

The office **phone** is hidden on the website while its value is empty (it is empty now). Type a number into it to show it again in the footer, the Home quotation band and the Contact page.

Values are checked: a retention of "twelve" or a recipient of "itdept" is refused with the reason. **Add parameter** works only in the option groups (building types, locations, job types, brand colours); the other groups have a fixed set of keys.

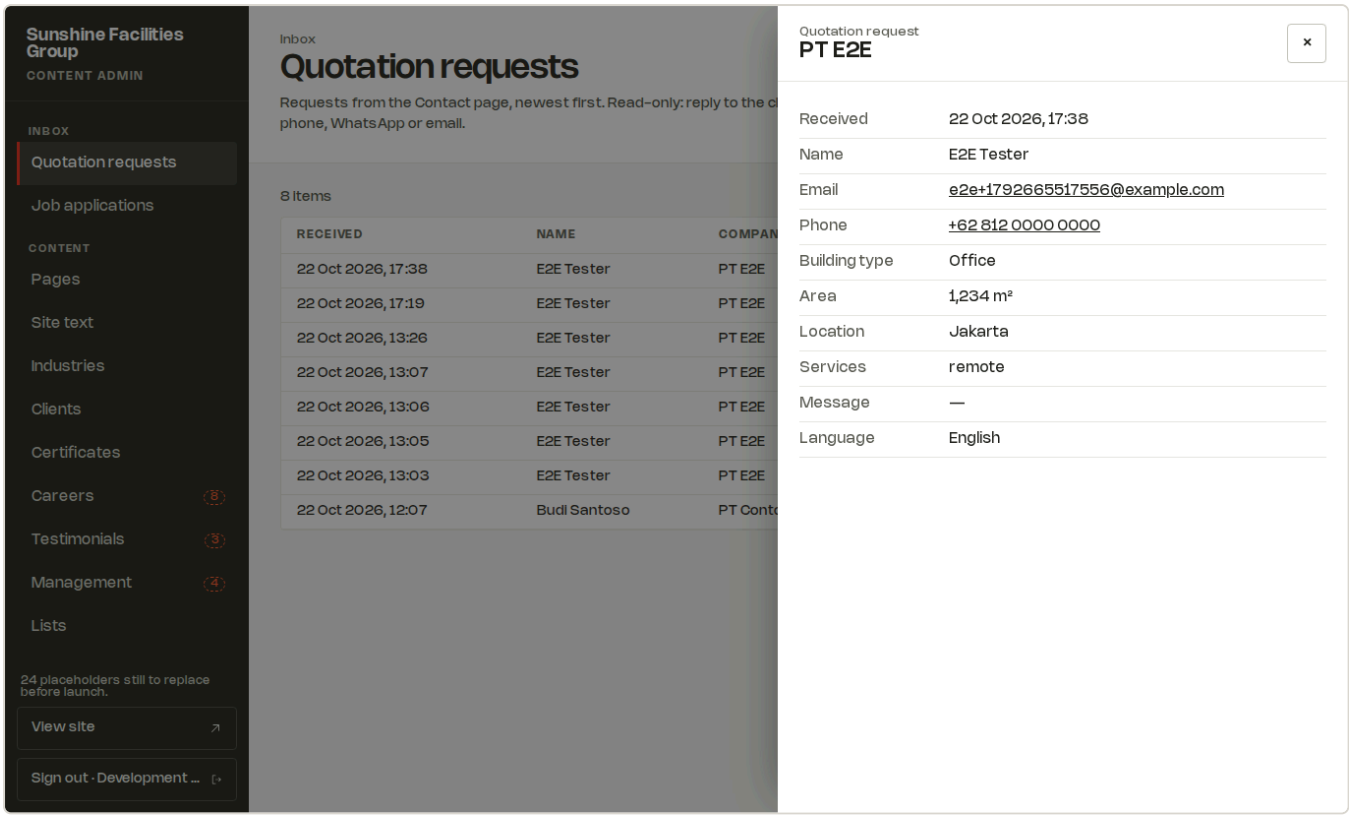

Inbox

Quotation requests (Sales)

Requests sent from the Contact page, newest first. Each one is also emailed to the people in *Parameters → Notifications → quotation_to*.

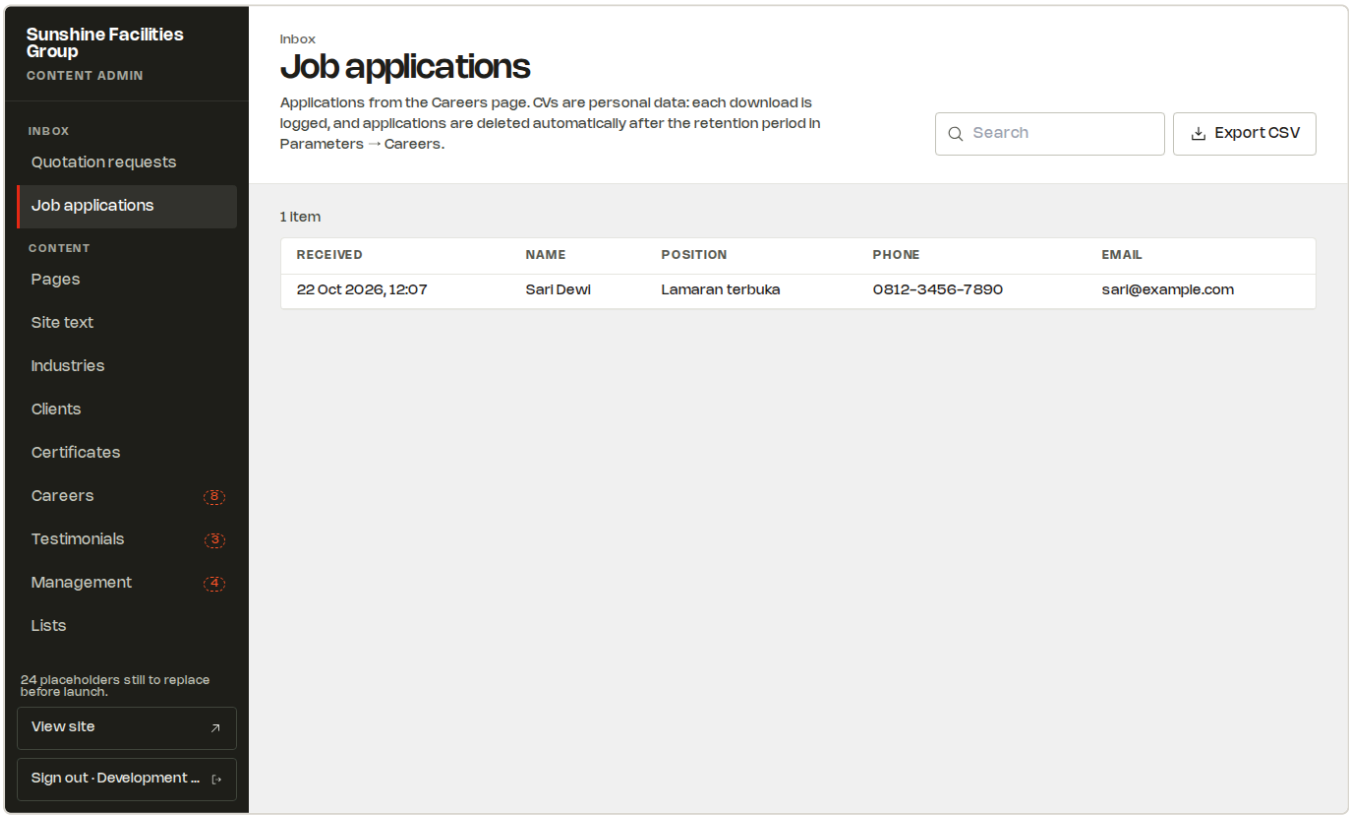

Click a row to see everything the visitor sent. Email and phone are links.

The inbox is **read-only**: there is no status or reply button. Reply to the client by phone, WhatsApp or email.

Job applications (HR)

Applications from the Careers page, newest first, emailed to *career_to*.

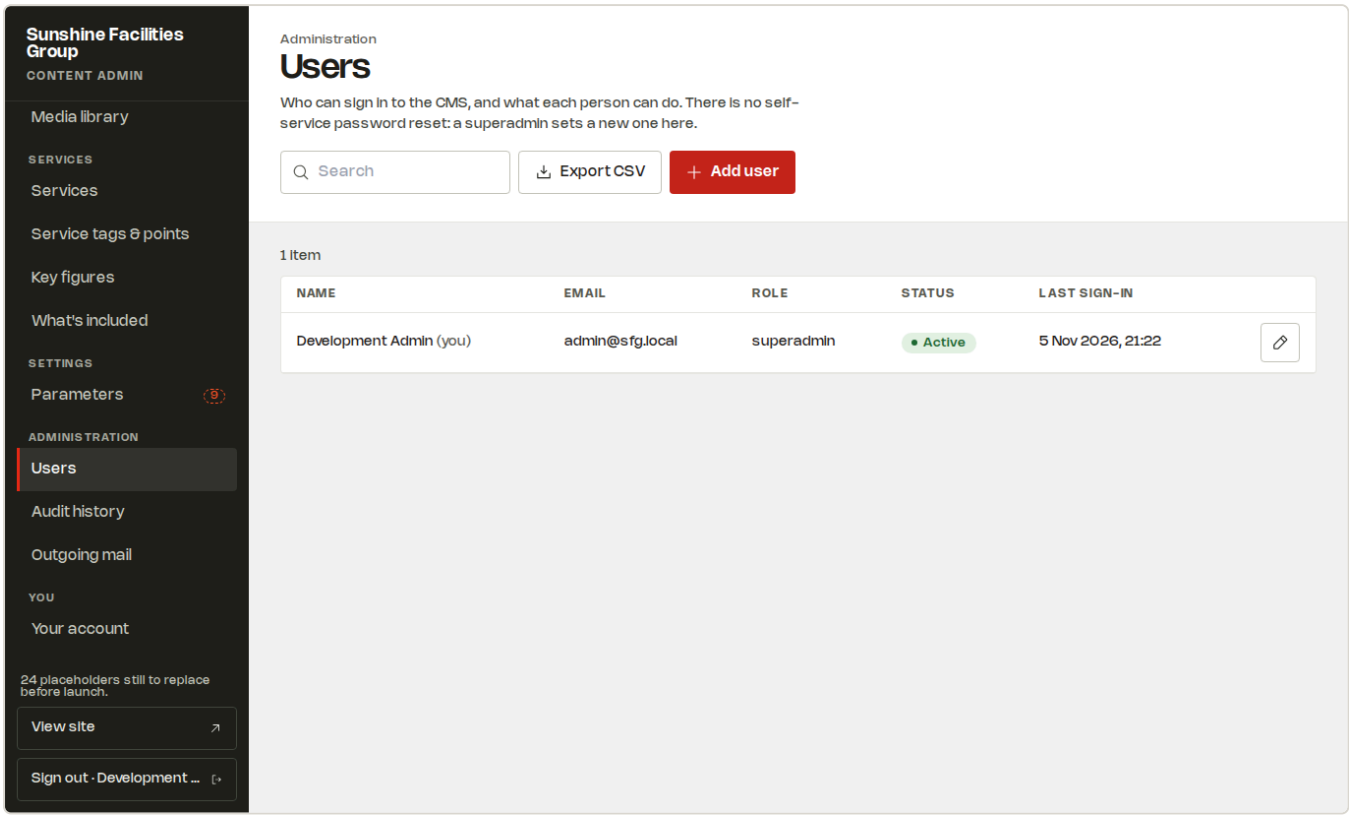

- **Open CV** gives a link that works for **five minutes**. Each opening is recorded in the audit history.

- The CV is never attached to the email: it is personal data and stays in the CMS.
- Applications are **deleted automatically** after the retention period (12 months unless changed in *Parameters → Careers*).

Users (superadmin)

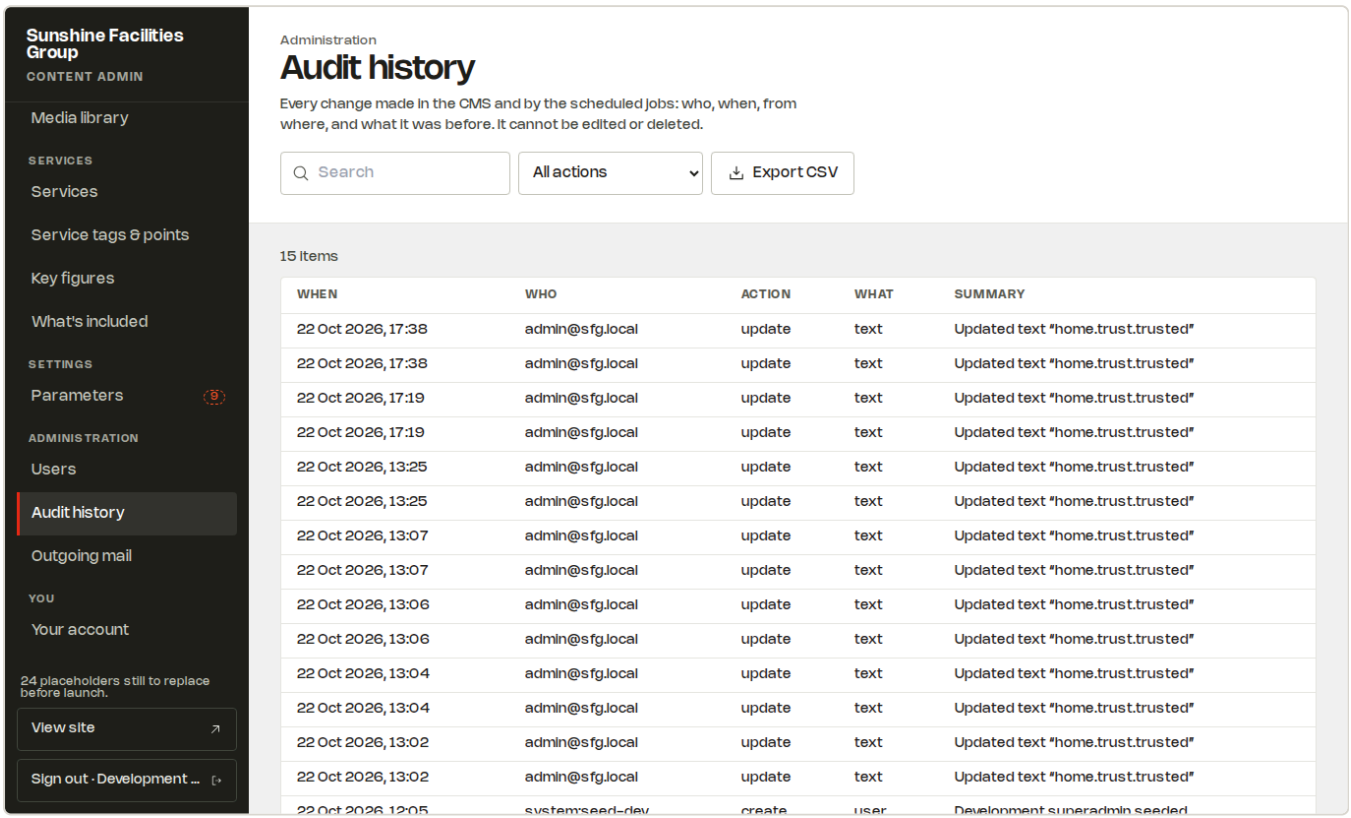

Who can sign in, and what each person can do.

- **Add user**: name, email, role and a first password. Give the password to the person directly; they can change it under *Your account*.
- Open a user with the **pencil** to change the role, deactivate the account, or **Reset password**. A reset ends that person's sessions at once and unlocks a locked account.
- You cannot demote or deactivate yourself, and the last active superadmin cannot be demoted: make someone else superadmin first.

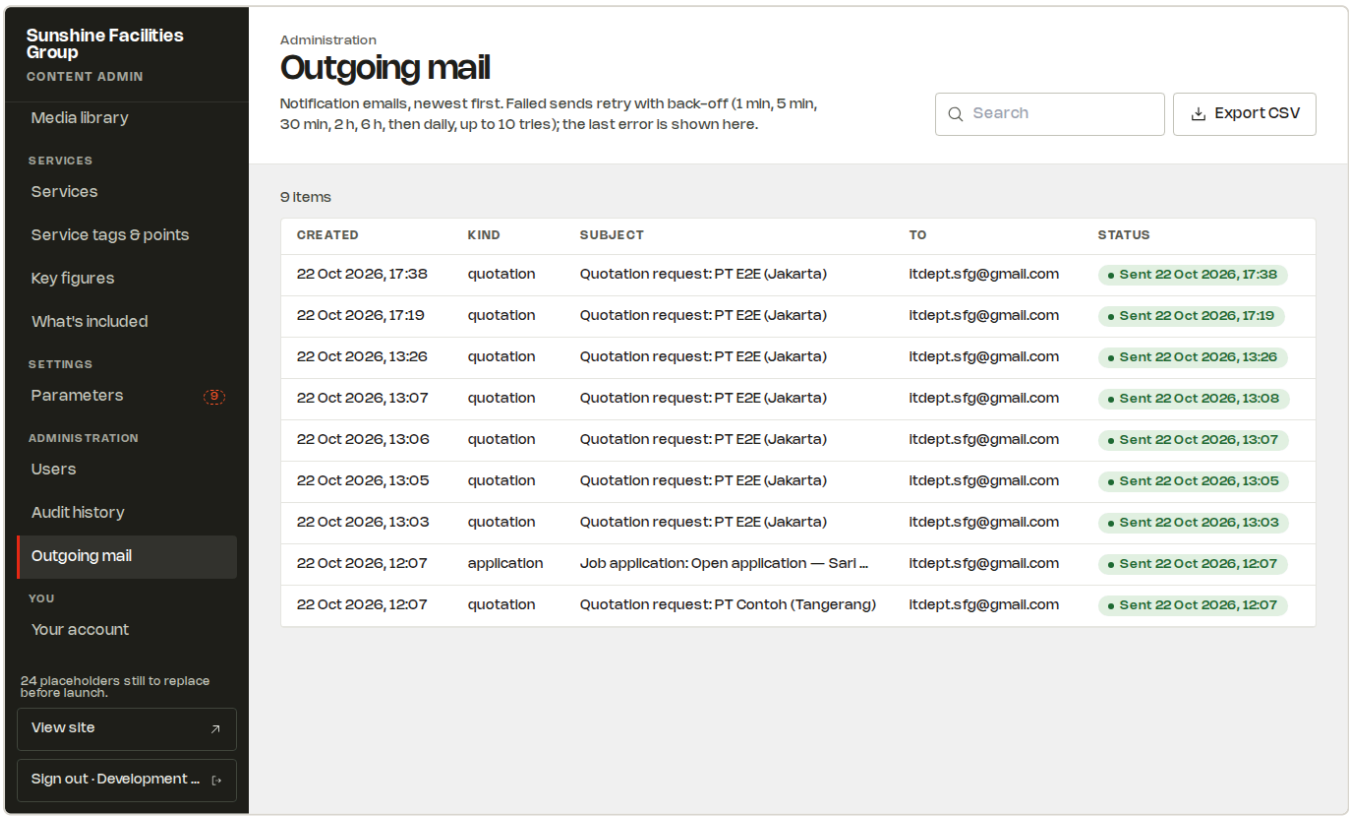

Audit history (superadmin)

Every change, upload, deletion, CV download, password change or reset, lockout and automatic deletion: who, when, from which address, and the values before and after. Searchable and exportable. Nobody can edit or delete it.

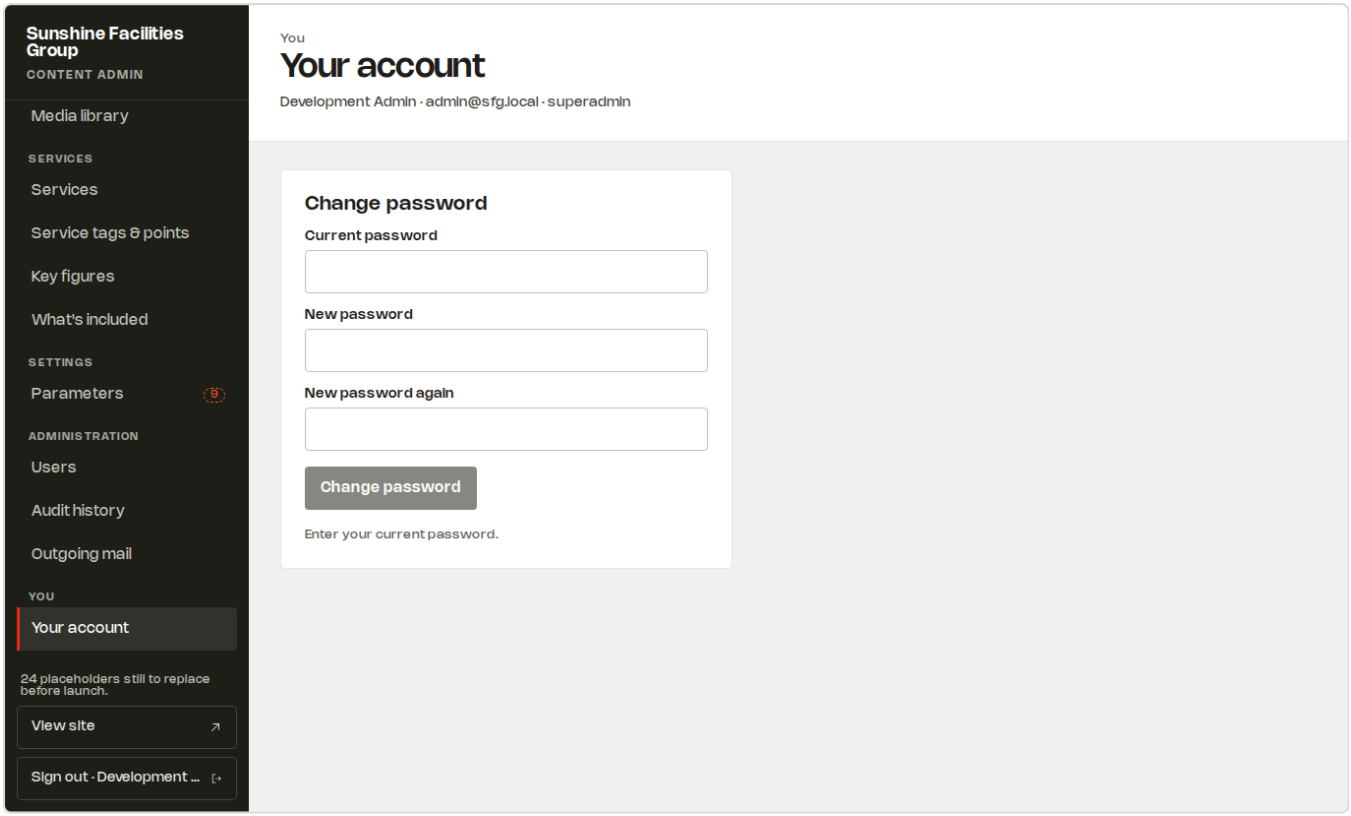

Outgoing mail (superadmin)

Every notification email: **Queued**, **Sent**, or **Failed** with the last error. Failed emails retry automatically (1 min, 5 min, 30 min, 2 h, 6 h, then daily, up to 10 tries). The request itself is always safe in the inbox, even when an email fails.

Your account

Your name, email and role, and **Change password**. Enter your current password and the new one twice. Use at least 12 characters.

Good habits

- Check the sidebar's **placeholder count**. It should reach 0 before launch.
- Superadmin, monthly: look at **Outgoing mail** for failures, review the **certificate dates**, and export the **audit history** if you keep an archive.
- Never share a password. Each person gets their own account so the audit history shows who did what.
- Something looks wrong on the site after a save? Open the same row, put the old text back, and press Save. The audit history shows exactly what the old text was.
